THE NINTENDO® 64 CONTROLLER

Control Stick Function

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding the L and R Buttons.

The Control Stick is a precision instrument - make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center™

Holding the Nintendo 64 Controller

While playing *Mischief Makers*, we recommend you use the hand positions shown at left. By holding the controller like this, you can operate the + Control Pad freely with your left thumb. Using your right thumb you can easily access the A, B or C Buttons. Using your left and right index fingers you can operate the L and R Buttons as well.

Connecting the Nintendo 64 Controller

To play *Mischief Makers*, you must connect a controller to Controller Socket One, located on the front panel of the Control Deck. If you should need to change the connection after beginning, switch the POWER to OFF. After you have made the correct controller connection, return the POWER to ON and begin play.

MAIN CHARACTERS

ULTRA-INTERGALACTIC- CYBOT-G, MARINA LITEYEARS

She's a high-powered robot who is an assistant to Prof. Theo. Usually, she is busy with her daily tasks, but when Theo is in trouble, she can become a powerful heroine.

THE ADVENTURER, PROF. THEO

He's a liery old man. He traveled to Clancer, from Earth, upon learning of the crisis that they were in. While he is a genius in the field of robotics, he's not very well known outside of the scientific community. While he can't seem to convince anyone of it, he claims to be the main character in this game.

THERE'S ALSO A GOOD CLANCER, AND HIS NAME IS TERAN

He's one of the few good Clancers left, and he's ready to help Marina. His specialties are the Triple Jump, Triple Punch and the deadly Final Blow. He will step forward to carry on the battle, should Marina get hurt.

AN EMPIRE ARMY COMMANDER, MIGEN, SR.

He's a ruthless man who controls his son, Migen, Jr. He has his son carry out his physical attacks. He's a Magician but, truth be known, he's not very powerful.

AN EMPIRE AIR FORCE GENERAL, MERCO

He's very good at attacking his enemies with his Golden Spear. He, and his Phoenix γ , are well respected by the Empire's Army.

AN EMPIRE MILITARY GENERAL, LUNAR

He's one of the three key officers of the Empire. He rides Cerebus α , and attacks his enemies with both a gun and missiles.

AN EMPIRE ARMY GENERAL, TARUS

He's as strong as a Gorilla, and quite fearsome when he's riding on his Sasquatch β . Perhaps it is because of his brute strength that he can respect a strong enemy.

WHO ARE THE CLANCERS?

The Clancers are mysterious residents who live on Planet Clancer. Everything on this planet begins with the word "Clan." For example, a "Ball" would be a "Clanball," and a "Coil" is a "Clancoil." They meant no harm when they kid-napped Prof. Theo. Normally, they live their lives quite peacefully, and are very lovable creatures.

STORY

Marina and Prof. Theo have finally arrived on Planet Clancer. The planet has been sending an S.O.S. signal, so it might not be too safe to be here. Therefore, Marina has decided to go out and scout out the planet, and get more familiar with the area.

"I'M BORED."

The Prof., who was left in the spaceship, is very bored. He was trying to find something to kill the time, when suddenly...

"DING, DONG (DOOR BELL RINGS)"

Something enters the Prof.'s room. The Prof. thought that these strange creatures were the welcoming wagon.

"WHAT THE HECK!?"

A large group of Clancers suddenly rushed into the room, and started going totally wild! The Prof. was quite confused, and the next thing he knew — he'd been kidnapped!

Marina, who's been out scouting, hears a familiar voice.

"MARINA! HELP ME!!"

"PROF.!!"

Marina hurried to where the voice was coming from, and got there in time to see the Prof. being kidnapped by the group of Clancers. Who are these creatures? Why would they want to kidnap the Prof.?

And so begins Marina's adventure.

CATCH AND THROW

Defending is an action which denies an enemies attack. But if their attack is too strong, you can use the B Button to turn their attack back on them. While this skill is helpful, it doesn't work against all enemies. You'll need to try it out to see who it's effective against..
